

Task Force Scope of Sampling

Out of Scope

LCB requirements for collecting samples

- Where to collect the sample
- How it's collected from the product
- What is a representative sample
- Who collects samples
- Training/credentials of sampler
- Re-sampling/sample mitigation
- Sample recording/Traceability
- Transport licenses
- Oversight/enforcement

In Scope

Lab requirements for accepting samples

- Sample container
- Volume of sample
- Sample condition at arrival (e.g. leaking, temp, hold time, preservation)
- Lab reviews how they handle field QC – when these are written into the methods, they are in scope.
- ETC

- Field QC
